

Restoring toolbars and customizations to factory defaults

Option 1 Reset your Toolbar and Customizations

Step 1: From the Tools menu, select Preferences.

Step 2: Click once the left-hand button of your mouse to untick the check box for *Remember menu/toolbar layout and customizations*.

Step 3: Exit from BullCharts

Step 4: Restart BullCharts

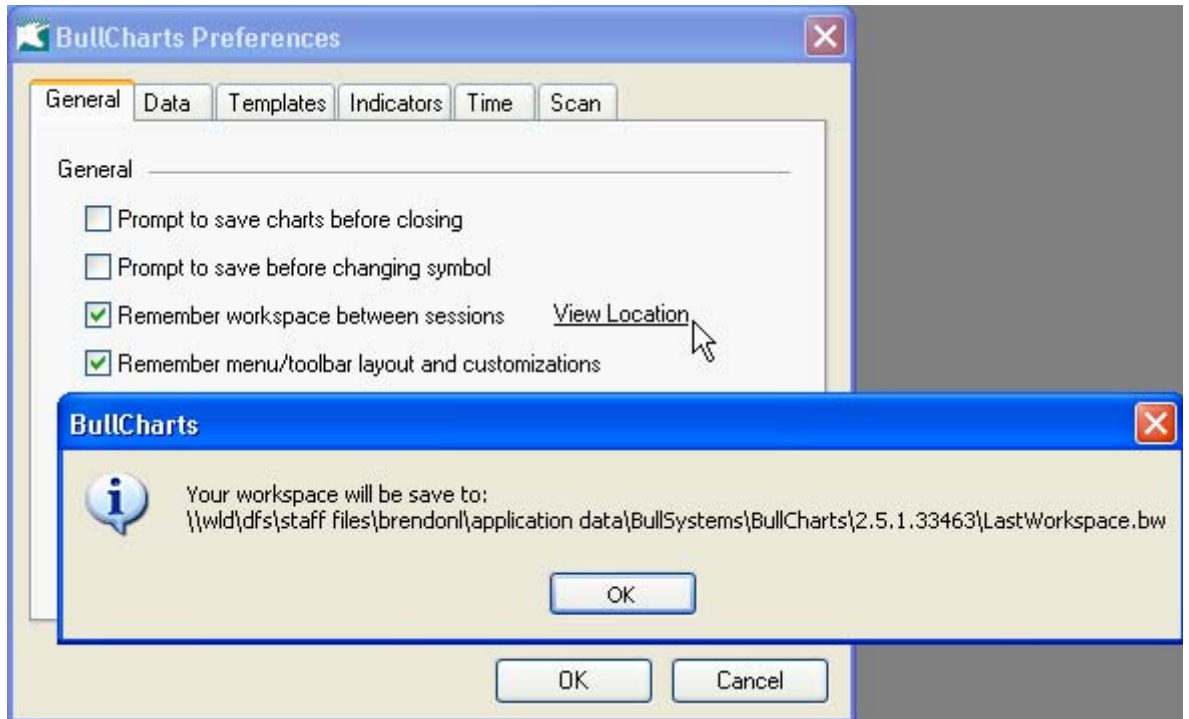

Step 5: From the Tools menu, select Preferences

Step 6: Click once the left-hand button of your mouse to tick the check box for *Remember menu/toolbar layout and customizations*

Option 2 Delete the ToolbarLayout.dnb

If you have completed Option 1, there is no need to perform Option 2. Option 2 is for advanced users.

We recommend that you make a copy of ToolbarLayout.dnb before you delete it. The file can be found in the same location as your LastWorkspace.bw file. From Tools, select Preferences. On the General Tab is an option to View Location where the LastWorkspace.bw and ToolbarLayout.dnb are stored. Delete only ToolbarLayout.dnb.
