

## Installing TradeSim with BullCharts

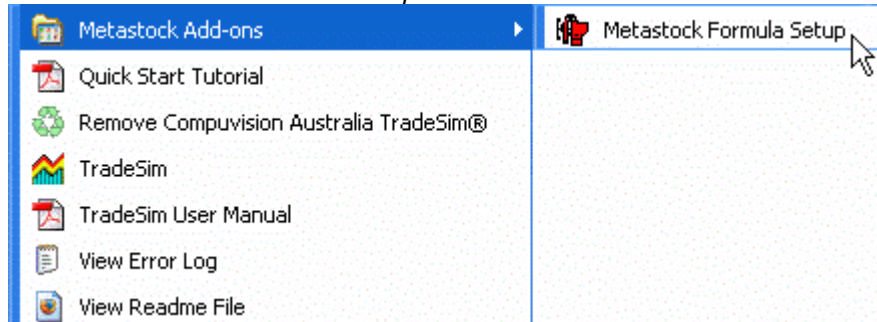

### A. If you have already installed TradeSim with Metastock

If you have Metastock already installed and are experiencing problems installing the plug-in for BullCharts, follow these steps:

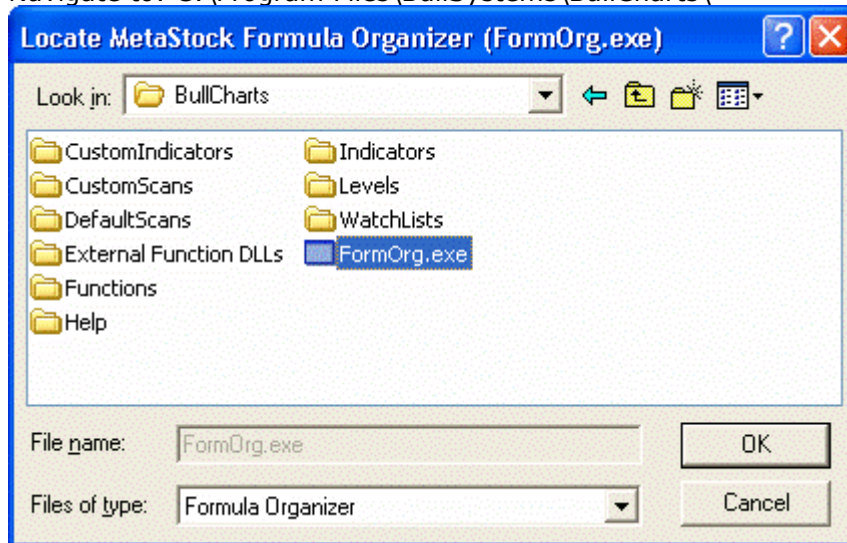

1. Open windows explorer.
2. Browse to:  
C:\Program Files\Equis\MetaStock\External Function DLLs\
3. Right click on TradeSim.dll and select copy.  
If you do not see TradeSim.dll then TradeSim has not been set up in Metastock yet either.
4. Paste the file into:  
C:\Program Files\BullSystems\BullCharts\External Function DLLs\
5. Restart BullCharts. You're now ready to use TradeSim.

## B. If you have already installed the TradeSim program

1. Click on the Start menu, then all programs, and locate the TradeSim program folder.
2. Select *Metastock Formula Setup* in the *Metastock Add-ons* folder.

3. Navigate to: C:\Program Files\BullSystems\BullCharts\

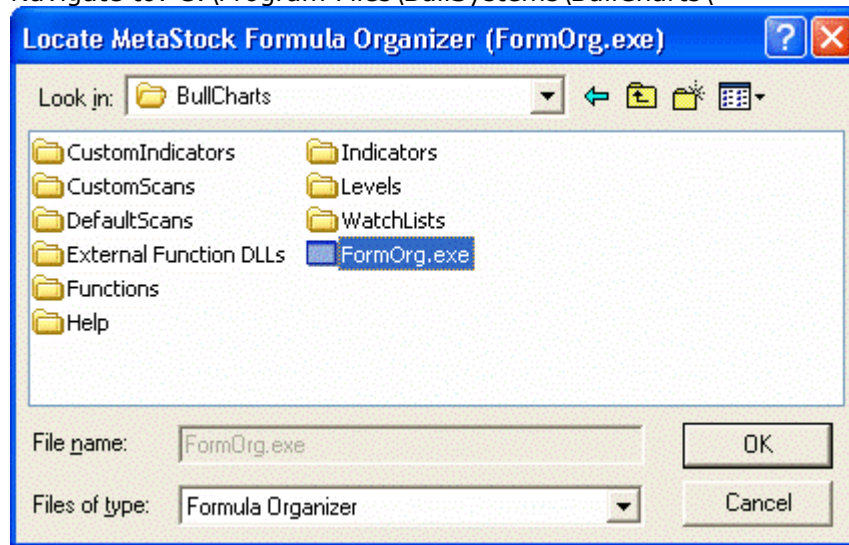

4. Select the FormOrg.exe program and click OK.
5. Read the copyright notice and press Accept.
6. You will see a message indicating that the TradeSim dll was installed. Click OK.
7. Restart BullCharts

### C. If you have *not* already installed the TradeSim program

1. Follow the TradeSim installation instructions.
2. During installation, you will be asked to locate the FormOrg program.
3. Navigate to: C:\Program Files\BullSystems\BullCharts\

4. Select the FormOrg.exe program and click OK.
5. Read the copyright notice and press Accept.
6. You will see a message indicating that the TradeSim dll was installed. Click OK.
7. Continue with the installation.
8. Restart BullCharts.
