

How to remove the BullCharts registries

Please note that this information is for experienced users only. Incorrect removal of registries can potentially destabilize a system. You should backup any important information.

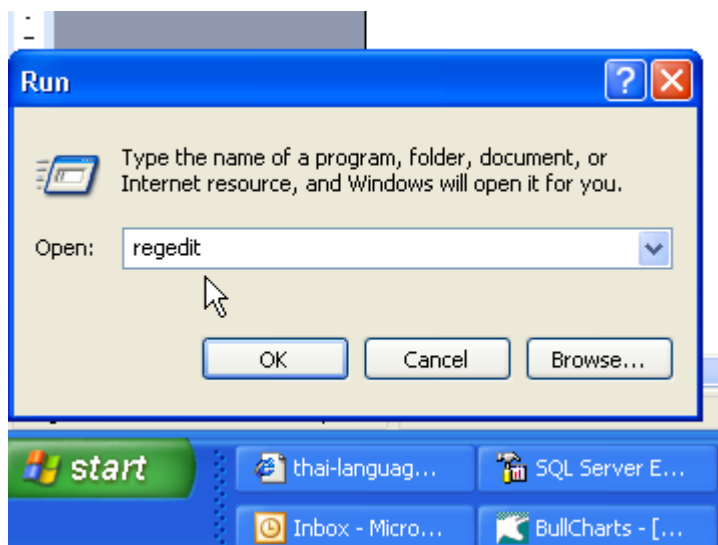

First you need to:

1. Remove BullCharts using Add/Remove Programs from the Control Panel
2. Remove Microsoft SQL Server Desktop Edition Add/Remove Programs from the Control Panel
3. Rename the directory C:\Program Files\BullSystems
Eg: C:\Program Files\BullSystems Old
4. Rename the directory C:\Program Files\Microsoft SQL Server
Eg: C:\Program Files\Microsoft SQL Server Old
5. Delete the Registry settings following the instructions below:

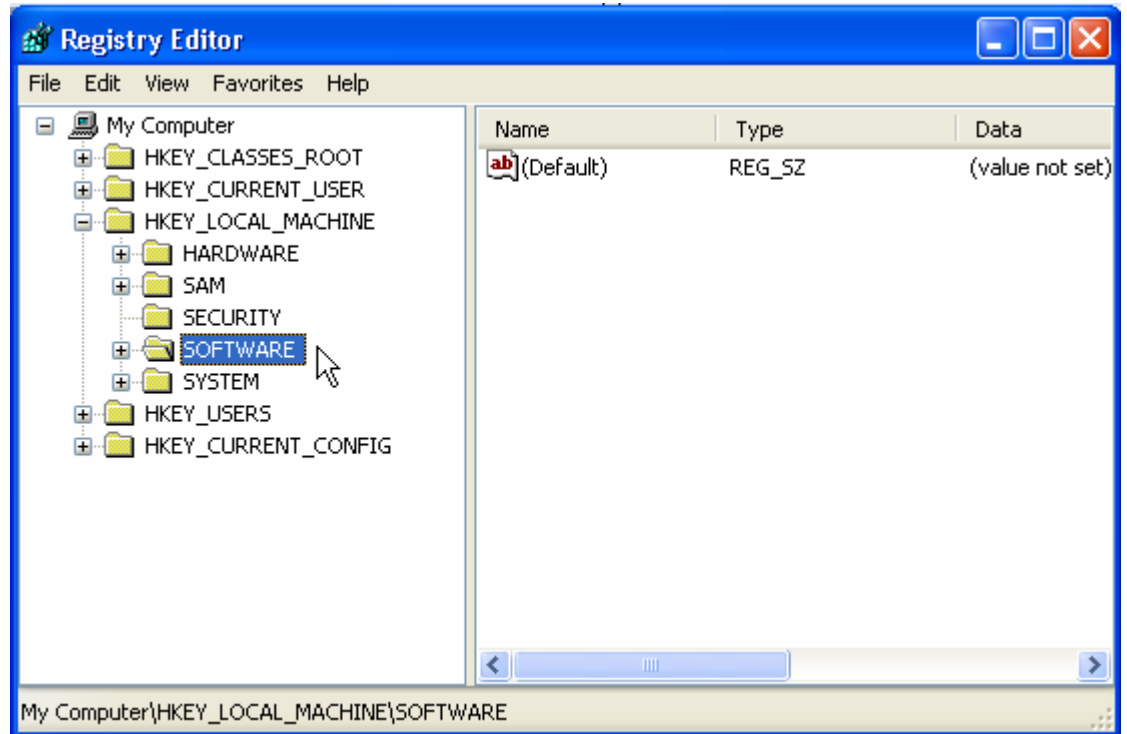

Select Run from the Start menu.

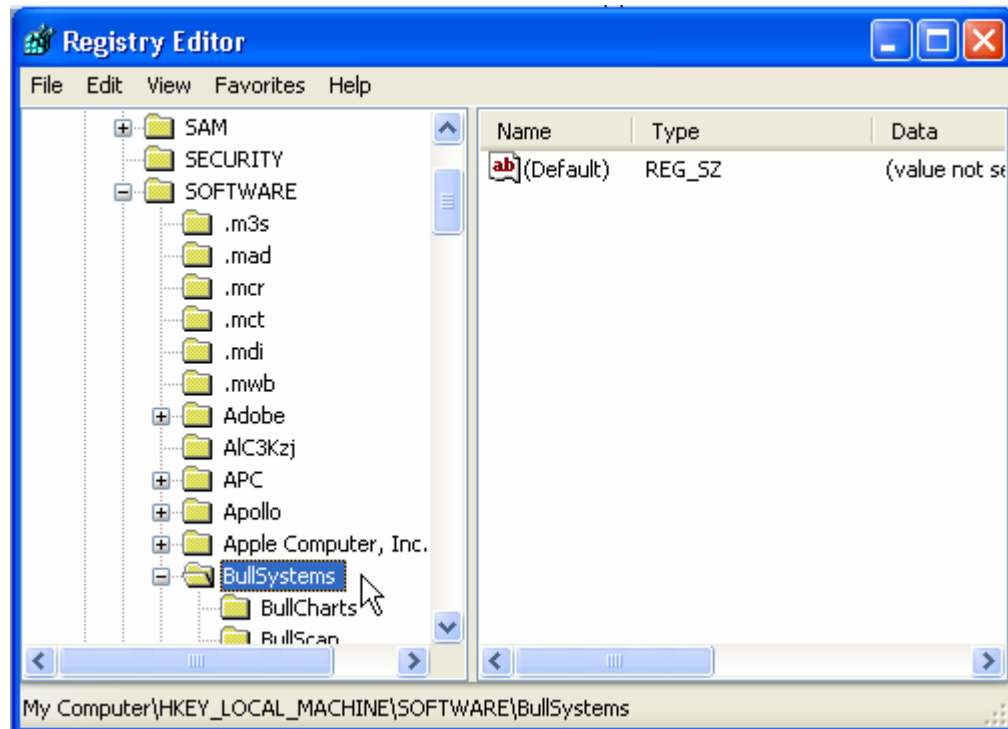

Type in regedit and click OK.

Expand the HKEY_LOCAL_MACHINE folder.

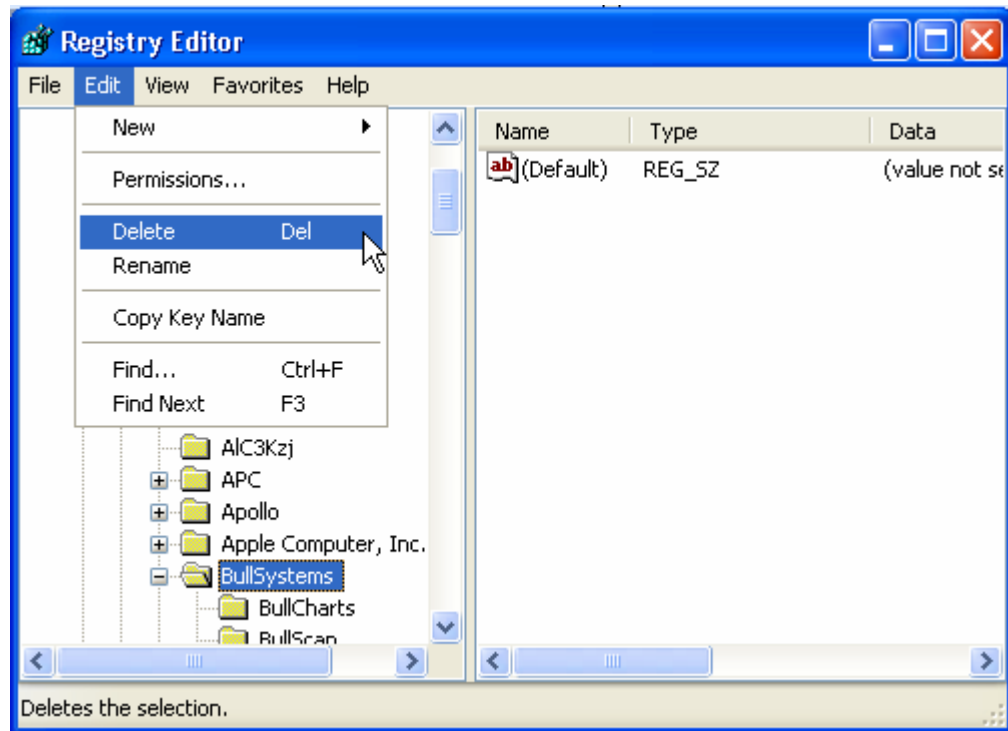

Select Software to expand the folder and then select BullSystems.

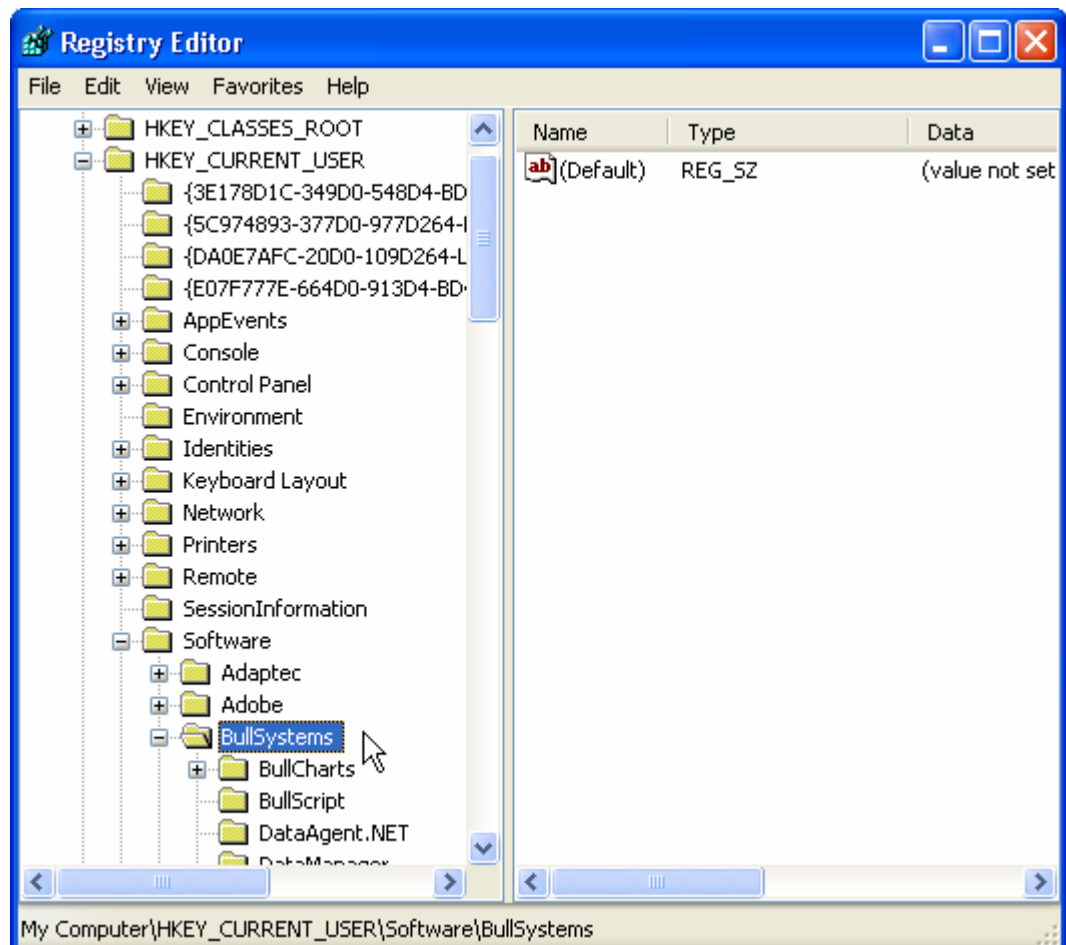

• Trade your own way •

Select Edit from the main menu and then Delete.

Follow the same process to delete the registries from HKEY_CURRENT_USER.
