

How to setup Intraday Scans

Data Plans

Intraday scans are available to the various plans. Times are approximate.

Dynamic Live Data

The live data plan allows you to take a snapshot of live data every 10 minutes as well as the 5 snapshot.

Snapshot Intraday Plan

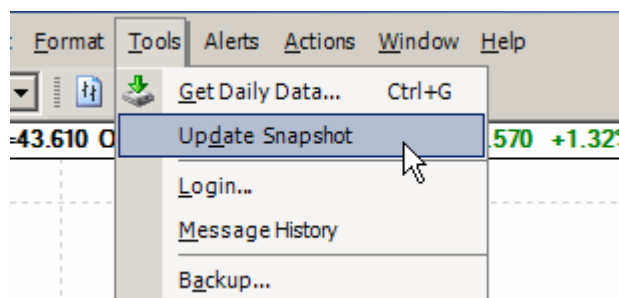

11.20, 12.20, 13.20, 14.20, 15.20, 5.00 7.30.

End Of Day Data Plan

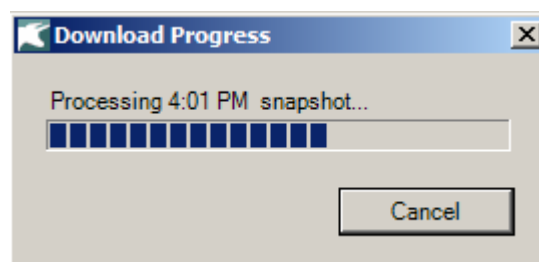

5pm and 7.30pm

STEP 1 Download the Intraday data

1. Go to Tools then click on Update Snapshot

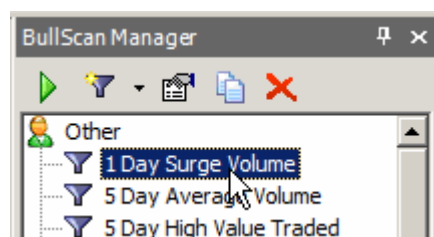

A message will indicate what snapshot is being processed

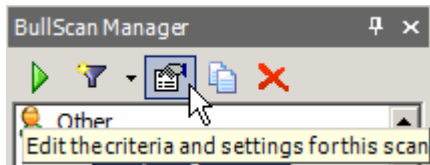

Once complete you can then run your scan

STEP 2 Set up your scan for Intraday data

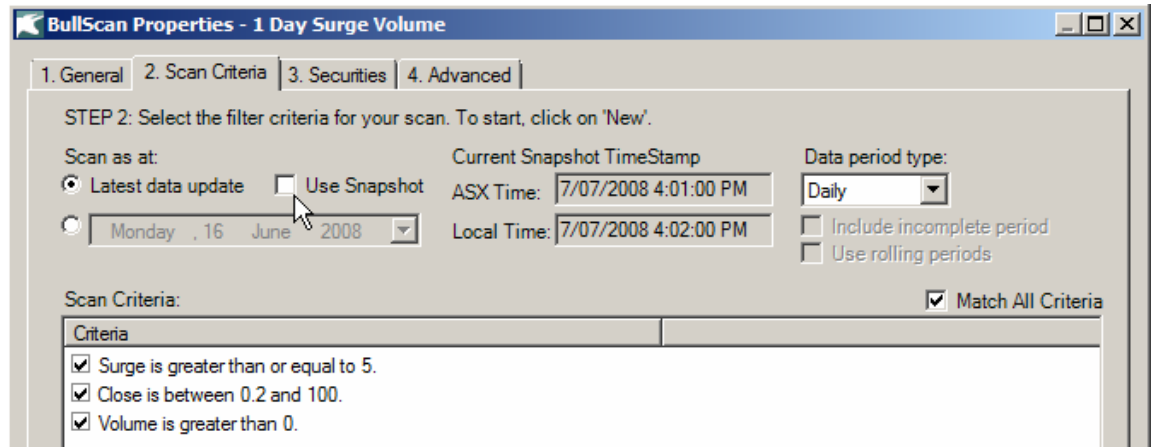

Select the scan you wish to edit and double click to show the properties.

Alternatively, select the *Properties* icon.

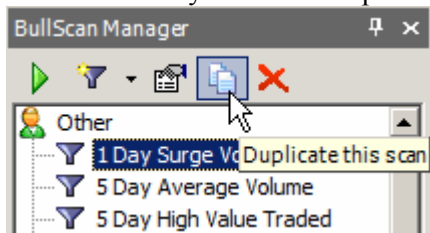

Tick *Use Snapshot*. The scan will now access the Snapshot database base.

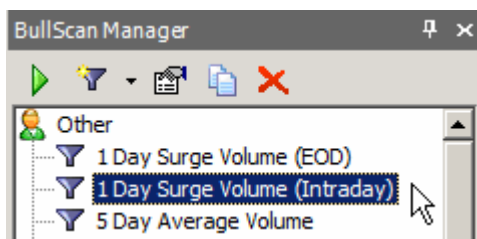

Duplicating a scan

You may wish to create a duplicate scan so you can have one scan for End of Day and one for Intraday scan.

Select the scan you wish to duplicate then the *Duplicate* icon.

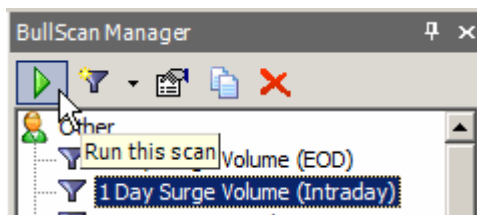

You can then rename the scan by pressing *F2*.

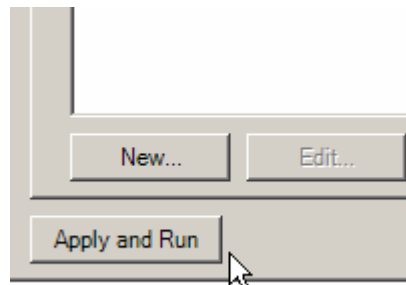

STEP 3 – Run your Intraday Scan

To run your Intraday scan, select the scan that has been set to scan on Intraday data, then click on the *Run* icon.

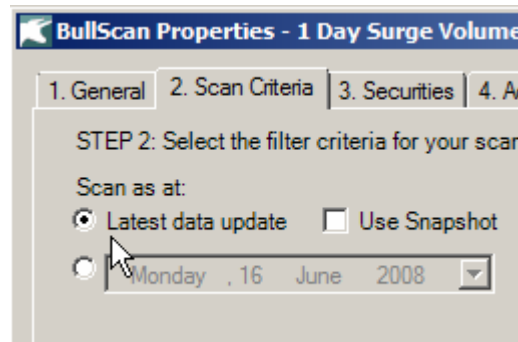

Alternatively, you can run the scan from the properties box by clicking *Apply and Run*.

Revert back to End of Day data

Untick *Use Snapshot* and select *Latest data update* if it is not selected.

Question and Answer

Will I be able to scan on 1 minute data intervals?

No. The scan comparison is between the last values download in the Snapshot table compared to the closing price of yesterday. There is no option to scan over one minute etc intervals or previously downloaded snapshots.

With Intraday scans, am I able to scan historically?

Yes. Your 20 day moving average will still scan the last 20 days and include the Snapshot values as one of the values.

Is there an option to automatically download the snapshot?

No. There is no option for scheduling to automatically download a snapshot.

Troubleshooting

There are no snapshots to download.

Please wait until the next snapshot is available.
